

- Today Grade 6 students from EF6A and MF56A participated in their virtual Scientists in School workshop. We had planned to do this from school (with the presenter joining us virtually), but we needed to change the plan when virtual learning was extended. Thanks to Jody, and Rich, and all the students and family members who dropped by school on Friday afternoon to pick up the student kits for this activity (with very little notice), the workshop happened today! Thanks to School Council for your support in providing these workshops to our students.
